

Lawnmower accident - laceration of fingers

G.P., 59 year-old male with severe laceration of fingers due to lawnmower accident. Day 1 – Small finger and adjoining finger were treated immediately with hyCure® powder. Powder stopped bleeding and relieved excessive pain from deep laceration of both fingers. Day 2 & 3 – Response to collagen as tissue sealant evident. New granulation tissue present, pain was minimized. Day 7 – Wound healed. Day 10 – No evidence of laceration or scarring present.
