

## PiercingCare®

PiercingCare® will revolutionize the way you care for ear and body piercings/tattoos. PiercingCare utilizes advanced technology and can be called a smart antiseptic, as it is formulated with a "Bio-Active" and contains hyCURE® hydrolyzed collagen, a natural ingredient that reduces bacterial contamination in wounds, specific to ear/body piercings and tattoos. hyCURE® provides superior wound protection and management. Biodegradable and biocompatible, PiercingCare® is cost effective and easy to use.

In a world where infectious organisms are of increasing concern, PiercingCare® can add a greater degree of confidence to the practitioner and the customer knowing that their new piercing is being protected by the best product available today.

Here are actual test results against some of the toughest organisms:

<u>Organism</u>	<u>Exposure Time</u>	<u>RF (% reduction)</u>
E. Coli	60 sec	99.370%
	120 sec	99.790%
Staph. Aureus	60 sec	99.984%
	120 sec	99.996%

Incredible results with no dermal irritation! When compared to other antimicrobials including alcohol's, PiercingCare® was much more effective, much less irritating, and longer lasting.

With increasing pressure on the piercing/tattoo industries, we urge you to take a close look at this exciting product. PiercingCare® is available in a 15 mL dropper bottle. For distribution opportunities, contact Dr. George Petito of Hymed® at 610-865-9876.
